I'm a product designer who is fluent in both design and code. As the lead UX designer in a product team, I led with best practices in design research, usability testing, prototyping, and accessibility.

Experience

- UX Designer, GovTech Singapore — Jan 2018–Jan 2021
As a UX lead of My Legacy, I led multiple features, including the design system and a major redesign of the website's information architecture. Outside of my project work, I also facilitated design studios for the UX team and managed two direct reports.
- Independent iOS Developer — Jun 2016–Jul 2017
Independently built and launched an iPhone app for travellers to save places to their personal map and easily find what they're looking for on the go.
- UX Designer, RYDE Technologies — Nov 2015–Apr 2016
As the sole UX designer, I brought the team on board design thinking and guided product discussions to centre on user experience. In addition to user research and product design, I also developed tools and visualisations to improve data analytics.
- Web Developer, National University of Singapore — Oct 2013–Apr 2015
I designed and developed an online course platform for the Special Science department. Lecturers could use it to create supplementary lessons and quizzes to make their lessons more engaging.
- Data Visualisation Artist, Deloitte Analytics — Jul 2012–Mar 2013
I designed and developed interactive data visualisations which were used to demonstrate and sell complex data analytics concepts and cutting edge services to our clients.

Education

- Nanyang Technological University, Singapore — Bachelor of Fine Arts, 2008–2012
- Singapore Polytechnic — Diploma in Multimedia Technology, 2003–2006

Skills

UX & UI Design, Design Research, Frontend Web Development, React Web Frameworks, iOS Development
